PROFILE

Economics and Finance graduate (2:1, University of Reading) with strong quantitative coursework in Private Equity, Derivatives, and Financial Modelling. Five years of active personal investing in US equities, supported by self-built tools — including an automated trading-signal pipeline and an LLM-assisted trading journal. Combines finance fundamentals with AI-assisted development and prompt engineering to apply technology directly to investment workflows. Trilingual in English, Mandarin, and Cantonese. Seeking an analyst-track role in finance where quantitative thinking and AI fluency can be applied together.

EDUCATION

University of Reading — BSc Economics and Finance

2022 – 2025

Classification: 2:1 (Overall: 67.3%)

- **Private Equity and Venture Capital (IC309):** 80% — A
Covered the full PE/VC investment cycle: fund structuring, GP/LP relationships, deal sourcing, due diligence, buyouts, valuation, and exits. Applied through case studies and a group business plan project.
- **Derivative Securities (IC317):** 75% — A
Studied derivatives from theory to application: forwards and futures, interest-rate futures, options pricing and the Greeks, and swaps. Built skills in hedging and trading strategies and in evaluating derivatives for risk management.
- **Financial Modelling (IC212):** 71% — A
Hands-on Excel modelling covering time-series regression, equity and bond valuation, portfolio management, CAPM, and options pricing. Completed a group project on portfolio optimisation and bond immunisation under timed conditions.

WORK EXPERIENCE

1. Active Personal Investor — US Equities

2020 – Present

- **Analysis & Research discipline:** Five years of self-directed investing in US equities, combining fundamental and technical analysis to source opportunities. Continuously study market structure, macro drivers, and company financials to inform decisions.
- **Risk & portfolio management:** Run a personal portfolio with disciplined position sizing, risk controls, and ongoing performance review via a self-built trade journal (see [Projects](#)).
- **Signal automation:** Adapted the Trading-Signal Telegram Bot first built for a client engagement into a personal tool that screens finance news and market commentary in real time and pushes concise, trading-relevant alerts, sharpening and accelerating my own US-equity decisions.

Projects: LLM-Assisted Trading Journal & Performance Dashboard

Python, JSON, Anthropic Claude API

- **Built & shipped:** Solely designed and shipped a structured trade journal capturing entries, exits, position sizing, and rationale across the recorded trades, with computed performance metrics including win-rate, risk/reward, and P&L over time.
- **AI-powered review:** Integrated the Claude API to review recorded trades and surface patterns in decision-making, common mistakes, and risk-management weaknesses, applying generative AI directly to investment review.

2. Financial Research Assistant – GNS Intelligent Technology (HK) Ltd

Jan 2026 – Jun 2026

- **Financial analysis & research:** Conducted analysis to support strategic decision-making. Building DCF valuation models, assessing credit risk, and evaluating investment and strategic opportunities for company projects.
- **Automation & AI solutions:** Solely designed and implemented automation workflows and AI-driven solutions for client projects, streamlining manual processes and improving operational efficiency.

Projects: Trading-Signal Telegram Bot

Python, Google Gemini API, RSS Feed, GitHub Actions, Cloudflare Workers

- **Pipeline design:** Built an automated pipeline that ingests posts from finance-focused X accounts via RSS, uses Google Gemini to score each against trading-relevance criteria, and forwards qualifying posts as concise summaries to a Telegram channel.
- **Architecture & prompts:** Selected the stack (GitHub Actions for execution, Cloudflare Worker cron for scheduling) and wrote the prompts driving the relevance filter, replacing manual social media scanning to surface trading

signals faster and with less noise.

3. Inventory & E-commerce Operations Coordinator – Sheep Mai Mai

Apr 2026 – Present

- **Inventory operations:** Oversee inventory for a specialty coffee retailer, maintaining optimal stock across multiple SKUs and suppliers through proactive monitoring and timely reordering. Operate fully independently in a remote setting. Apply specialty coffee expertise to support purchasing and merchandising decisions.
- **E-commerce & merchandising:** Build and maintain product listings on Wix for new coffees' descriptions, pricing, and stock admin; and organise site layout and structure for a seamless customer journey.
- **Supplier management:** Manage email communications with global specialty coffee roasters, coordinating purchase orders, shipment timing, and product availability.

Projects: Mobile App — iOS & Android · Specialty coffee retailer (ongoing)

- **Solo end-to-end build:** Led design and development of the company's first mobile app for the App Store and Google Play, working solo to translate the online shopping experience into a mobile-native platform.

4. Barista — London Coffee Festival

May 2026

- Delivered high-volume specialty coffee service at one of the UK's largest coffee industry events, serving hundreds of customers daily in a fast-paced team environment.
- Engaged with industry professionals, roasters, and the public, strengthening communication and customer-facing skills.

OTHER PROJECTS

Casabrew — Coffee Logging Web App Live Product

casabrew.vercel.app | *Next.js, Supabase, Vercel*

- **Solo end-to-end build:** a full web app that is currently in use by cafés, roasters, and coffee specialists — to record extraction parameters and sensory data. Demonstrates ability to take a product from concept to a live deployment with real users.

SKILLS

- **Platform, Terminal & Tools:** Bloomberg, Reuters, Microsoft Excel, Power BI (basic)
- **Finance & Modelling:** Financial modelling, valuation, DCF, derivatives pricing, equity analysis
- **AI Tools:** Claude Code, ChatGPT, Gemini, NotebookLM, Obsidian
- **AI-Assisted Development & Prompt Engineering:** Build & ship apps using Claude & Gemini APIs — system/role prompting, few-shot, chain-of-thought, structured output, prompt chaining, context engineering; AI-assisted design, code review & testing
- **Programming & Tools:** Basic Python (pandas, API calls, scripts), JSON, Git/GitHub, REST APIs
- **Languages:** English (fluent), Mandarin (fluent), Cantonese (native)

LEADERSHIP & VOLUNTEERING

Vice President — Coffee Society, University of Reading

2025

- Co-led society operations, planned events, managed committee responsibilities, and coordinated with local cafes and external partners.

STAR Mentor — University of Reading Volunteering

2024 – 2025

- Mentored new students through their transition to university, answering questions on student life and helping them settle in academically and socially.

ADDITIONAL

- **Interests:** Finance, Equity markets, AI, Specialty coffee, Sports, music
- **Eligibility:** Available for full-time roles in the UK. No visa or sponsors required.
