

NG CHEUK LAM, ANSON

Leeds, UK | 07873 827027 | ansonng0422@gmail.com | [LinkedIn](#)

PROFILE

Economics and Finance graduate (2:1, University of Reading) with strong quantitative coursework in Private Equity, Derivatives, and Financial Modelling. Five years of active personal investing in US equities, supported by self-built tools — including an automated trading-signal pipeline and an LLM-assisted trading journal. Combines finance fundamentals with AI-assisted development and prompt engineering to apply technology directly to investment workflows. Trilingual in English, Mandarin, and Cantonese. Seeking an analyst-track role in finance where quantitative thinking and AI fluency can be applied together.

EDUCATION

University of Reading — BSc Economics and Finance 2022 – 2025

Classification: 2:1 (Overall: 67.3%)

- **Private Equity and Venture Capital (IC309): 80% — A**
Covered the full PE/VC fundraising and investment cycle: fund structuring and GP/LP relationships, business plan evaluation, deal sourcing, term sheets, due diligence, management buyouts, valuation, portfolio monitoring, and exit routes. Applied learning through case studies, guest practitioner seminars, and a group business plan project.
- **Derivative Securities (IC317): 75% — A**
Studied derivatives markets and their role in modern finance from both theoretical and applied perspectives. Topics included forwards and futures markets, interest rate futures, options properties and pricing, the Greeks, swaps, and other derivative instruments. Built skills in constructing hedging and trading strategies, interpreting pricing models, and critically evaluating the use of derivatives in risk management for banks, corporates, and institutional investors.
- **Financial Modelling (IC212): 71% — A**
Hands-on, lab-based module translating finance theory into working Excel models. Built models covering statistical analysis and time series regression, financial arithmetic, equity and bond valuation, portfolio management, the Capital Asset Pricing Model, and options pricing. Completed a group project on portfolio optimisation / bond immunisation, developing teamwork, technical modelling, and time-management skills under timed practical-test conditions.

SKILLS

- **Finance & Modelling:** Financial modelling, valuation, DCF, derivatives pricing, equity analysis
- **Microsoft Excel (Intermediate):** VLOOKUP, pivot tables, financial modelling, DCF,
- **AI & LLMs:** Anthropic Claude API, Google Gemini API; prompt engineering — role/system prompts, few-shot examples, chain-of-thought, structured output, iterative refinement, prompt chaining, context engineering
- **AI-assisted development:** Design, prompting, code review, and testing to ship working applications without writing all code from scratch
- **Programming & Tools:** Basic Python (pandas, API calls, scripts), JSON, Git/GitHub, REST APIs, Power BI (basic)
- **Languages:** English (fluent), Mandarin (fluent), Cantonese (native)

WORK EXPERIENCE

Inventory & E-commerce Operations Coordinator – Sheep Mai Mai (Remote) Apr 2026 – Present

- Oversee inventory operations for a specialty coffee retailer, ensuring optimal stock levels across multiple SKUs and suppliers through proactive monitoring and timely reordering.
- Build and maintain product listings on Wix for newly purchased coffees — handling product descriptions, imagery, pricing, and stock administration — and organise web layout and site structure to ensure a seamless customer journey.
- Manage supplier communications via email with global specialty coffee roasters, coordinating purchase orders, shipment timing, and product availability.
- Lead end-to-end design and development of the company's first mobile app for the Apple App Store and Google Play, working solo to translate the online shopping experience into a mobile-native platform — broadening audience reach and creating a new customer acquisition channel.
- Apply specialty coffee market knowledge — including familiarity with leading global roasters, origin trends, and current offerings — to support purchasing and merchandising decisions.
- Operate fully independently in a remote setting, balancing inventory, e-commerce, supplier, and product development responsibilities.

Financial Research Assistant – GNS Intelligent Technology (HK) Ltd Jan 2026 – Jun 2026

- Conducted financial analysis and research to support strategic decision-making, including building DCF valuation models, assessing credit risk, and evaluating investment and strategic opportunities for company projects.
- Designed and implemented automation workflows and AI-driven solutions for client projects, streamlining manual processes and improving operational efficiency.

Barista — London Coffee Festival May 2026

- Delivered high-volume specialty coffee service at one of the UK's largest coffee industry events, serving hundreds of customers daily in a fast-paced team environment.
- Engaged with industry professionals, roasters, and the public — strengthening communication and customer-facing skills.

PERSONAL INVESTING

Active Personal Investor — US Equities 2020 – Present

- Five years of self-directed personal investing, applying fundamental and technical analysis to identify opportunities across the US stock market.
- Manage a personal portfolio with disciplined risk management, position sizing, and ongoing performance review through a self-built trade journal (see Projects).
- Continuously study market structure, macroeconomic drivers, and company financials to inform decisions.

PROJECTS

LLM-Assisted Trading Journal & Performance Dashboard Personal Project

Python, JSON, Anthropic Claude API

- Designed a structured trade journal capturing entries, exits, position sizing, and rationale across the recorded trades, with computed performance metrics including win-rate, risk/reward, and P&L over time.
- Integrated the Claude API to review recorded trades and surface patterns in decision-making, common mistakes, and risk-management weaknesses — applying generative AI directly to investment review.
- Built using AI-assisted development; designed the data model, prompts, and review workflow, and reviewed and tested the resulting code.

Trading-Signal Telegram Bot Personal Project

Python, Google Gemini API, RSS.app, GitHub Actions, Cloudflare Workers

- Designed an automated pipeline that ingests posts from finance-focused accounts on X via RSS.app, uses Google Gemini to evaluate each post against trading-relevance criteria, and forwards qualifying posts as concise summaries to a Telegram channel.
- Selected the architecture (GitHub Actions for execution, Cloudflare Worker cron for scheduling) and wrote the prompts driving the relevance filter; replaced manual social-media scanning to surface trading information faster and with less noise.

Casabrew — Coffee Logging Web App Live Product

casabrew.vercel.app | *Next.js, Supabase, Vercel*

- Designed and shipped a full web app — currently in use by cafés, roasters, and coffee specialists — to record extraction parameters and sensory data. Demonstrates ability to take a product from concept to a live deployment with real users.

LEADERSHIP & VOLUNTEERING

Vice President — Coffee Society, University of Reading 2025

- Co-led society operations, planned events, managed committee responsibilities, and coordinated with sponsors and external partners.

STAR Mentor — University of Reading Volunteering 2024 – 2025

- Volunteered as a Student Mentor through the university's STAR programme. Supported a cohort of 5–25 new students through their transition to university, providing guidance via email and in person from pre-arrival through the year. Answered queries on student life, attended welcome events, and built rapport to help mentees settle in academically and socially.

ADDITIONAL

- **Interests:** Equity markets, specialty coffee, building software side-projects with AI tools, snooker, swimming.
- **Eligibility:** Available for full-time roles in the UK.
